1424 South Ellison Drive  
Ste. 100  
San Antonio, TX 78245  
(210) 670-8400

## Overnight Release Form

### REQUIREMENTS FOR BOARDING

1. All animals must be current on ALL vaccinations. (Rabies, Dhlpp, Bordetella, Canine Influenza)
2. All animals must be free of internal and external parasites (ex:ticks, fleas, etc.), or they will be treated at owner's expense.
3. ELLISON DRIVE ANIMAL HOSPITAL has my permission to do whatever is necessary should an issue arise.
4. If a tranquilizer is necessary for treatment or handling, ELLISON DRIVE ANIMAL HOSPITAL has my permission to administer such medication.
5. Pets may be picked up between the hours of 7am - 6pm, Monday through Friday.

I certify that my pet (if a dog) is current on Bordetella to prevent a "Whooping Cough" respiratory infection. My pet may exhibit symptoms of the infection even if current on Bordetella because he/she may be a carrier. The infection being stress induced can cause such symptoms to occur during or after their stay here. It is more likely for my pet to exhibit such symptoms if the Bordetella was administered nasally rather than injected.

If your pet is experiencing flu-like symptoms or other respiratory problems (ex:coughing, hacking, high fever, nasal discharge) during or after their stay here, ELLISON DRIVE ANIMAL HOSPITAL is not responsible for the cost of treatment. **We Recommend your pet be current on the Influenza Vaccine up to 2-3 months prior to boarding.** If the vaccine is too recent upon arrival, your pet's body has not built up enough immunity to fight the infection. Canine Influenza is highly contagious, and if not treated, long term infections can cause lung scarring or even death. **Every dog and cat that will be staying in the clinic will be given a pill called Capstar to kill fleas, regardless if your pet is current on a monthly flea prevention. Cost to owner is \$11-\$15.**

I agree to make complete payment to this boarding facility at the time of discharge. I certify that my pet appears free of contagious diseases and has not bitten anyone in the past ten days. If pet does show aggression while boarding and bites an employee, the owner is responsible for rabies quarantine and will not be allowed to board at either of our facilities again. I understand that if I fail to pick up my pet within ten days of notification to the above address, my pet will be considered abandoned and will be handled in accordance with the requirements of state law, and that doing so does not relieve me of my financial obligations to this facility.

\*All **GROOMING** services will incur additional charges, and by signing this form you understand and comply with these additional charges.

**I have read the boarding requirements and understand the hospital's policies and requirements.**
